
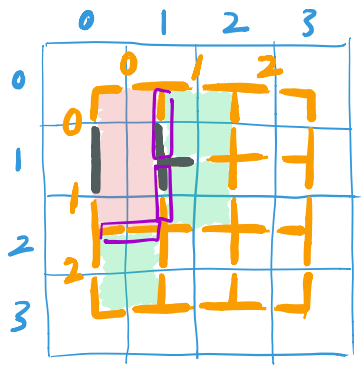
CORNER

1. Open up downwards

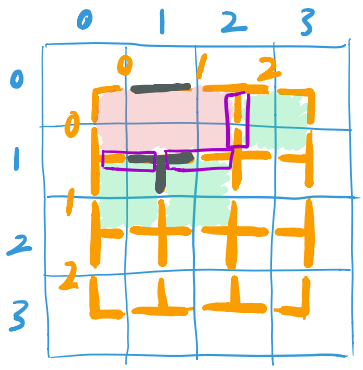


Open up (1,0)

(0,1) from ⊢ to |

(1,1) from + to ⊢

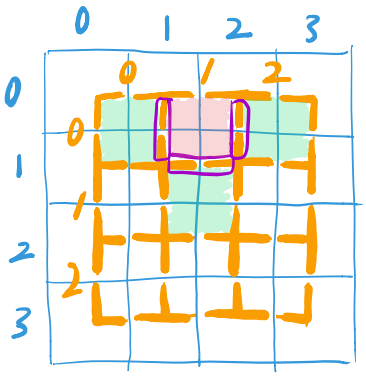
2. Open up Sideways



Open up (0,1)

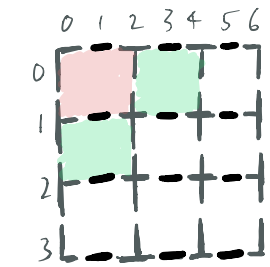
(1,0) from ⊤ to —

(1,1) from + to ⊤



EDGE

- Just realized that the grid is actually 7 x 4 with extra hyphens from coding the grid



- Should create another list for frontiers (in this case, 3 x 3, but i-4 x j-1)

DONE (2)	FRONTIER	
FRONTIER		

- When all the numbers become 0 in the "invisible" list, the maze should be finished

- but first, finish the drawings for the different scenarios
